

LA-320

QUICK START GUIDE

EXTEND YOUR WARRANTY FREE!

Your new LA-320 comes with a 1 year warranty. Want to double it? Register your new microphone within 30 days of purchase at: LautenAudio.com/Register

CAPSULE

32mm custom-crafted, hand-tuned transducer designed explicitly for modern recording.

NOTE: Use a pop filter for vocal recording to protect the capsule from moisture and debris.

LOW-FREQUENCY SOUND SHAPING

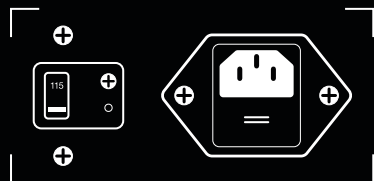

The flat setting allows the full low-frequency extension of a sound to be captured.

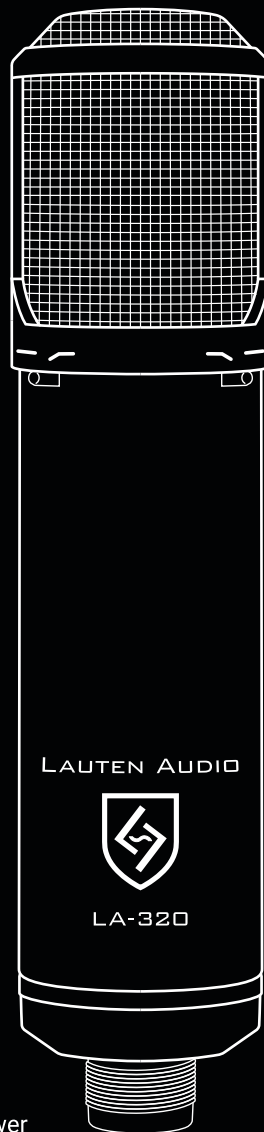

The 120Hz setting reduces low frequencies and mud while increasing clarity.

EXTERNAL POWER SUPPLY

Your LA-320 must be connected to the included power supply to work. Please ensure the voltage switch is set to match your country's power requirements.

NOTE: 48V Phantom Power is not required for use.

SPL & DYNAMIC RANGE

Your LA-320 is able to withstand up to 130dB of SPL and provides 120dB+ of dynamic range to ensure optimal performance on any sound source.

HIGH-FREQUENCY SOUND SHAPING

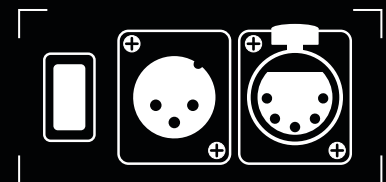

The flat setting is modern, articulate, and bright but never harsh.

The 12kHz setting is smooth, dense, and warm like a vintage microphone.

5-PIN CABLE

Your LA-320 microphone connects to the External Power Supply via the included 5-Pin cable.
